Education

Bachelor of Science: Information Technology, Gokul Global University, Siddhpur (Jun 2022 – Jul 2025)

- Class Topper
- Strong foundation in Web Development, Programming, Databases & Software Engineering
- Built multiple full-stack projects using React.js, Node.js, Express.js, MongoDB
- Known for problem-solving, consistency, and hands-on practical execution

Profile

Motivated and self-taught Full-Stack MERN Developer with real-world experience building full production-grade apps. Skilled in JavaScript, React, Node.js, and MongoDB with strong knowledge of API development, authentication (JWT + bcrypt), RBAC, and modern UI design. Seeking a Full-Stack / React / Node.js role to apply skills and deliver impactful products.

Skills

- Frontend: React (Hooks, Context API, Routing), JavaScript (ES6), TailwindCSS, Bootstrap, Responsive UI
- Backend: Node.js, Express, REST APIs, JWT Auth, RBAC
- Database: MongoDB, Mongoose, Aggregations, Pagination, Optimized CRUD
- Tools & DevOps: Git, GitHub, Postman, Render / Vercel Deployment
- Languages: English, Hindi

Projects

QuizNova – AI-Powered Quiz & Learning Platform

Tech: React, Node.js, Express, MongoDB, JWT, Tailwind CSS

Live: <https://quiz-nova-app.vercel.app/>

GitHub: <https://github.com/codewithAman-256/QuizNova-App>

- Built full SaaS-style platform with full authentication (JWT + bcrypt)
- Dynamic quiz system with categories, AI-based suggestions & analytics
- Developed Admin Dashboard for CRUD operations
- Implemented Leaderboard, Ranking, Streak System, Achievements
- Designed User Dashboard with interactive charts
- Fully deployed (Render + Vercel)

SaaS Food Ordering Platform (In Progress)

Status: Building full restaurant SaaS with customer, staff, owner & super admin logins.

Tech: React, Tailwind, Node.js, Express, TypeScript, MongoDB, Mongoose, Socket.io, Docker, GitHub Actions

- Multi-restaurant ordering system with real-time order tracking
- Live chat, email notifications, analytics, and performance monitoring
- Building Super Admin Panel for approvals, audit logs, health monitoring
- Modular backend architecture with JWT auth, MongoDB aggregations, CI/CD pipeline

Achievements

- Designed and deployed multiple production-level full-stack apps
- Improved API design, problem-solving & scalability understanding
- Strong ability to convert requirements into working systems
